To Whom It May Concern:

I recently represented and guided our company through the design, out-fitting and purchase of a 28 foot unit from Concession Nation. I cannot express enough, how smooth the entire process went. From the initial conversation with Keith to the sit down and design process with Alex the project moved impressively quick and seamless. Once the final plans were approved and deposits accepted, I was amazed at the speed and intensity by which the entire Concession Nation production team executed their respective tasks. From the bare bones empty floored trailer to the fit and finish of the final product, with its gleaming stainless steel walls, floor and ceiling, we could not be happier with the end result.

The impact of seeing this unit moving down the road or sitting on site, with a very impressive wrap job is eye-popping. We have had the opportunity to operate the unit and have executed several events to date with very few hiccups. The design could not be more efficient. We have added additional pieces of equipment since the initial completion and have been extremely pleased with the amount of space still available to develop. The layout is definitely setup for speed. When visited by any of the local health departments for certification they only have good things to say about the entire rig and it's over delivery of dept. standards.

If I were building another unit, I would work with no one else except the team at concession nation.

Kudos to the entire staff and thanks!
